Healthy Bites Website – Explanation, Features and Development

1 Introduction

The Healthy Bites website is a simple, responsive, front-end website designed to introduce healthy food categories, easy recipes, daily meal suggestions, and healthy eating tips. It uses HTML for structure and CSS for layout and styling. Its green-and-white design reflects the topic of healthy eating.

2 Features

1. Home Page and Navigation

Displays the Healthy Bites title, tagline, navigation links and a welcome banner with an Explore Recipes button.

2. Food Categories

Presents vegetables, fruits, whole grains and protein foods in separate information cards.

3. Healthy Recipes

Provides ingredients, short preparation instructions and approximate calories for Vegetable Oats, Fresh Fruit Salad and Sprout Salad.

4. Daily Meal Plan

Shows suggested foods for breakfast, lunch, evening snack and dinner.

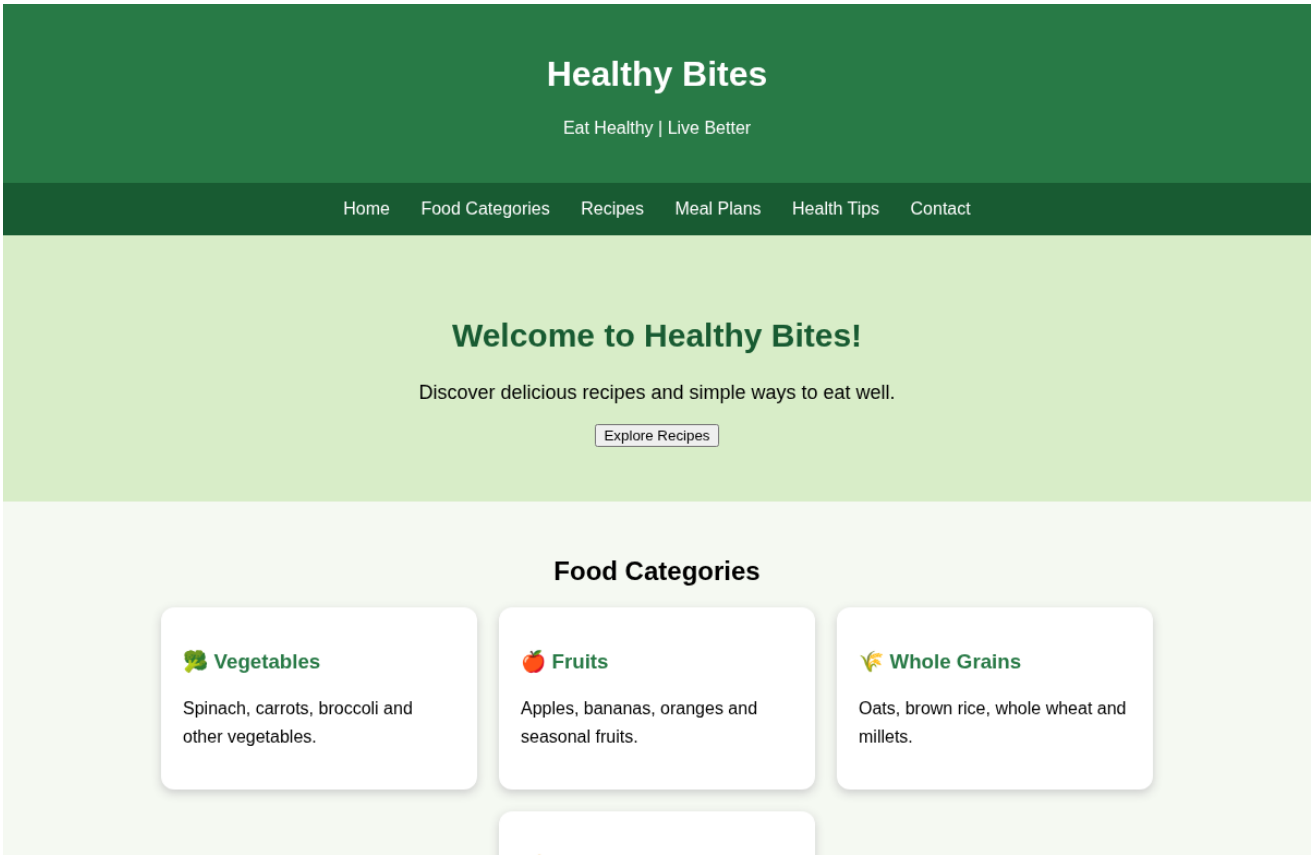

5. Healthy Eating Tips

Lists suggestions about fruits, vegetables, proteins, whole grains, water and limiting excess salt and sugar.

6. Contact and Footer

Displays a sample email address, phone number, copyright and tagline.

Website Output – Top Section

3 Explanation of HTML Elements

HTML element	Purpose
<!DOCTYPE html>	Declares HTML5 document type.
<html>, <head>, <body>	Define document structure, metadata and visible content.
<title>, <meta>	Set tab title and mobile viewport behavior.
<style>	Contains internal CSS rules.
<header>, <nav>	Show the website heading and section links.
<section>,	Group content and organize card layouts.
<h1>, <h2>, <h3>, <p>	Show headings, descriptions and instructions.
<a>, <button>	Provide section navigation and the Explore Recipes control.
<b>, <footer>	Emphasize labels and display the footer.

Important attributes: id identifies a section; href="#recipes" links to it; class assigns CSS styles; name and content configure the viewport.

4 Explanation of CSS

CSS selector / property	Function
background-color, color	Set green-themed backgrounds and text colors.

CSS selector / property	Function
margin, padding	Control outer and inner spacing.
font-family, font-size	Set readable Arial text and heading sizes.
display: flex, flex-wrap: wrap	Arrange cards in rows that wrap on narrower screens.
justify-content, gap	Center cards and control spacing.
width, max-width	Control card and tips panel sizes.
border-radius, box-shadow	Round card corners and add shadows.
:hover, transform	Change link colors and lift cards on hover.
@media (max-width: 600px)	Adjust navigation, cards, spacing and banner heading for phones.

Responsive Design

For screens 600 pixels wide or smaller, navigation links become inline blocks, the container padding becomes 15px, cards expand to full width, and the banner heading is reduced to 24px.

5 Development Process

Step 1: Plan the website sections: Home, Food Categories, Recipes, Meal Plans, Health Tips and Contact.

Step 2: Create semantic HTML for the header, navigation, banner, sections and footer.

Step 3: Add cards for food categories, recipes and daily meals.

Step 4: Apply green color themes, flexible card layouts, shadows and hover effects using CSS.

Step 5: Add a media query and test the layout at desktop and mobile widths.

6 Advantages

Simple navigation; readable content cards; recipes with basic instructions; meal-plan examples; practical healthy-eating reminders; responsive design; and a beginner-friendly single-file HTML/CSS structure.

7 Limitations and Future Improvements

The website is primarily static. It has no database, user login, personalized nutrition advice, recipe search, or contact form. The Explore Recipes button navigates to the recipe section, but does not perform a search. Future improvements could include JavaScript filtering, a recipe database, nutrition verification, accessibility enhancements and a functional contact form. Calorie figures are approximate and meal suggestions are

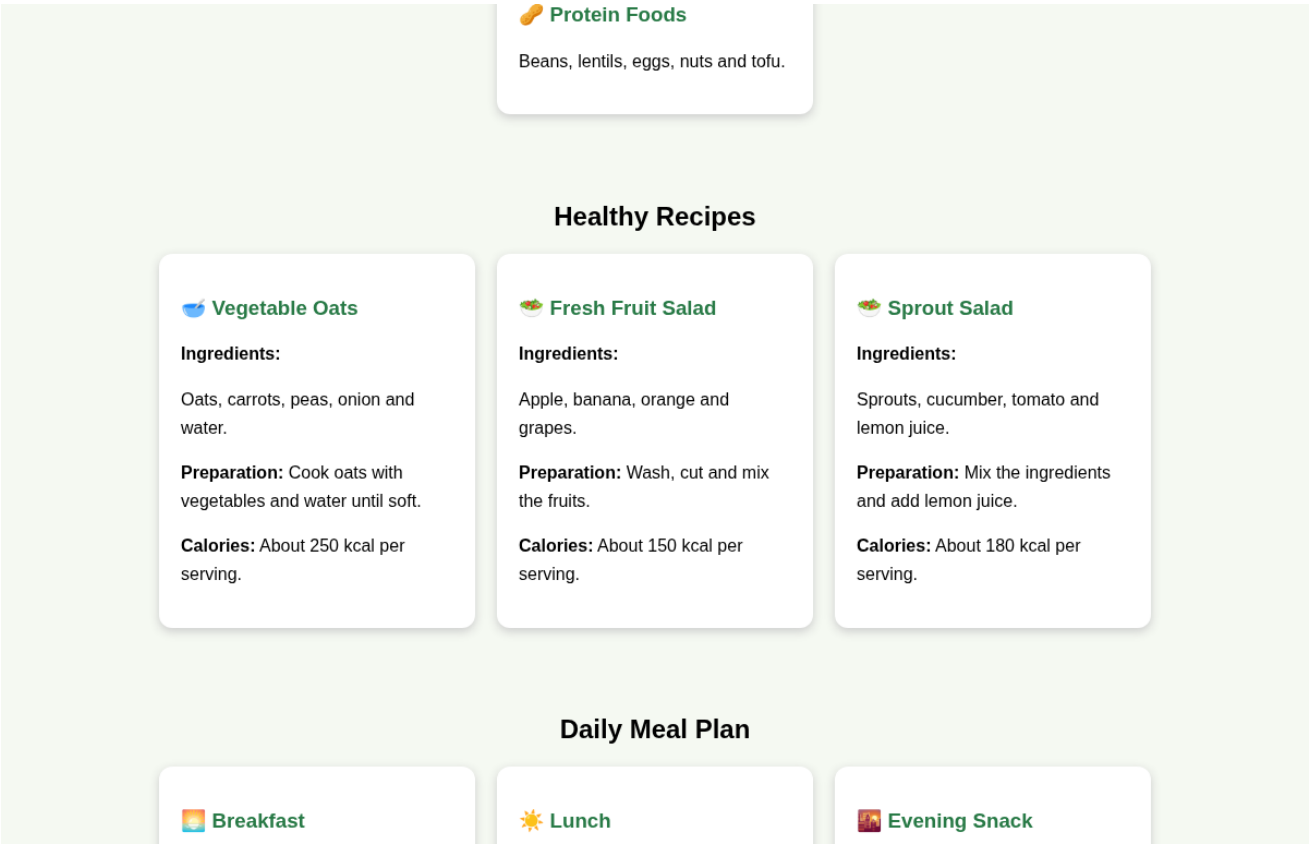

general examples.

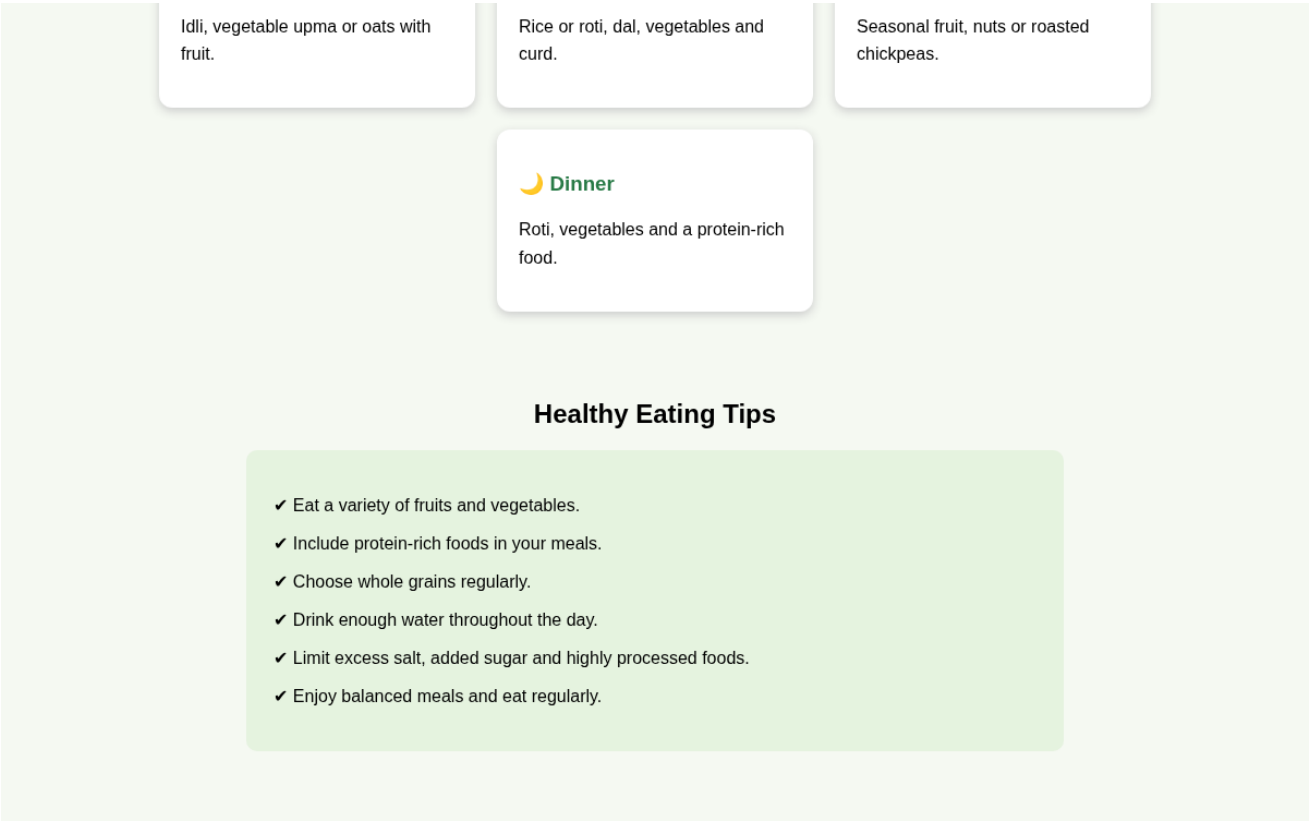

8 Conclusion

Healthy Bites demonstrates how HTML and CSS can create an organized, responsive educational website about food and nutrition. It provides a foundation for more interactive recipe and meal-planning features.

9 Output

Screenshots captured from the supplied HTML file at a desktop browser width.

10 Complete HTML and CSS Code

The following is the original uploaded code, preserved without modifications.

```
<!DOCTYPE html>
<html>
<head>
  <title>Healthy Food and Nutrition</title>
  <meta name="viewport" content="width=device-width, initial-scale=1.0">

  <style>
    body {
      margin: 0;
      font-family: Arial, sans-serif;
      background-color: #f5f9f2;
    }

    header {
      background-color: #287a46;
      color: white;
      text-align: center;
      padding: 25px;
    }

    nav {
      background-color: #185b32;
      padding: 15px;
      text-align: center;
    }

    nav a {
      color: white;
      text-decoration: none;
      margin: 12px;
    }
```

```
nav a:hover {
    color: #ffe082;
}

.banner {
    background-color: #d8edc8;
    text-align: center;
    padding: 50px 20px;
}

.banner h2 {
    color: #185b32;
    font-size: 30px;
}

.banner p {
    font-size: 18px;
}

.container {
    padding: 30px;
    text-align: center;
}

.cards {
    display: flex;
    flex-wrap: wrap;
    justify-content: center;
    gap: 20px;
}

.card {
    background-color: white;
    width: 250px;
    padding: 20px;
    border-radius: 12px;
    box-shadow: 0 3px 8px #cccccc;
    text-align: left;
}

.card h3 {
    color: #287a46;
}
