Sweet Crumbs Bakery Website – Explanation, Features and Development

1 Introduction

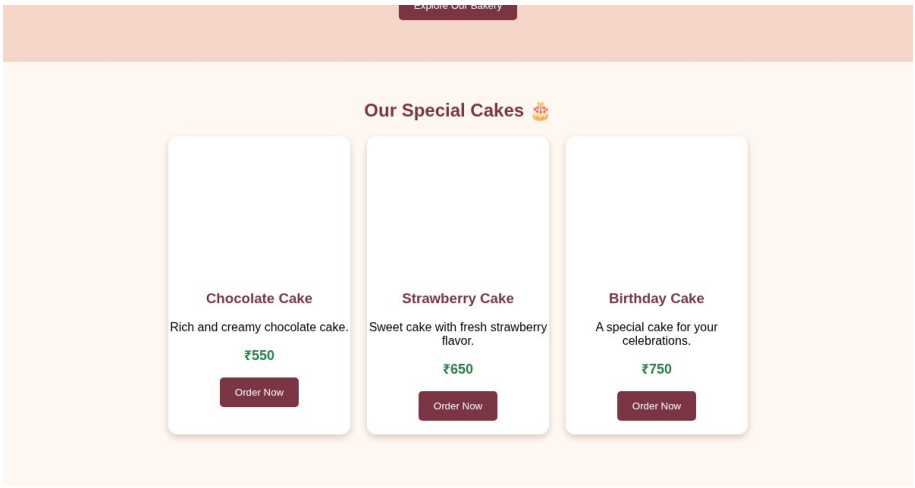

The Sweet Crumbs Bakery Website is a responsive, front-end bakery showcase developed using HTML and CSS. It displays cakes, pastries, cookies, custom cake designs, seasonal offers and contact information. The cream, pink and burgundy color scheme gives the website a warm and welcoming appearance.

2 Features

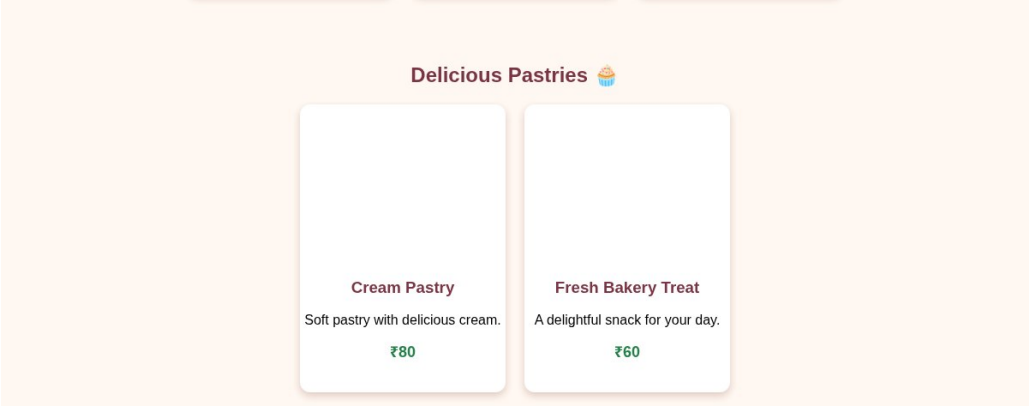

1. Home Page and Navigation

Displays the bakery name, welcome banner, navigation links and an Explore Our Bakery button.

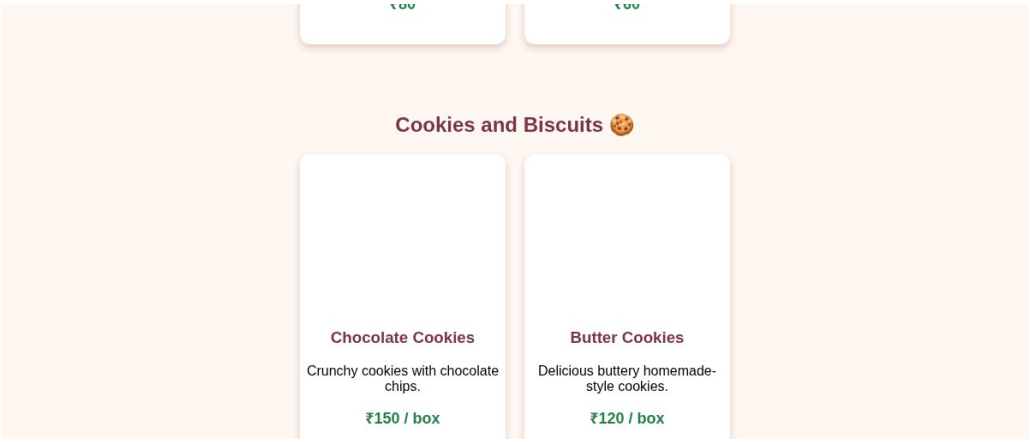

2. Special Cakes

Shows Chocolate Cake (■550), Strawberry Cake (■650), and Birthday Cake (■750), including descriptions, prices and Order Now buttons.

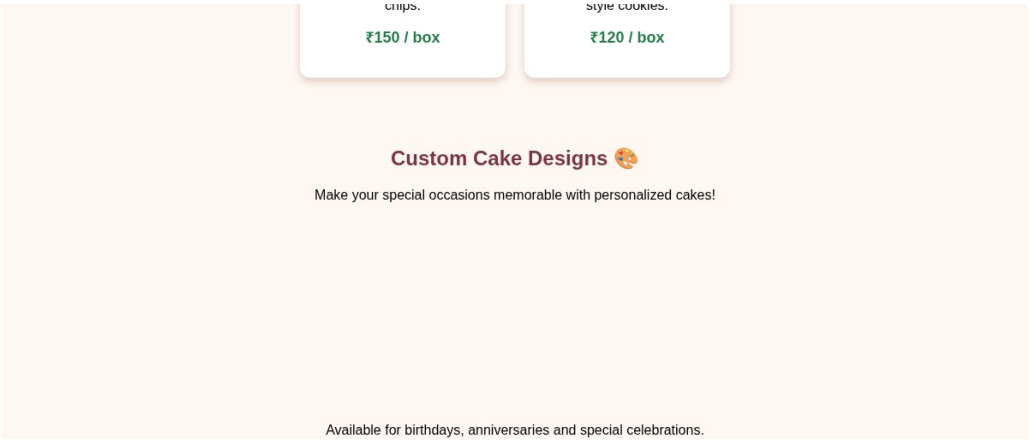

3. Pastries

Displays Cream Pastry (■80) and Fresh Bakery Treat (■60).

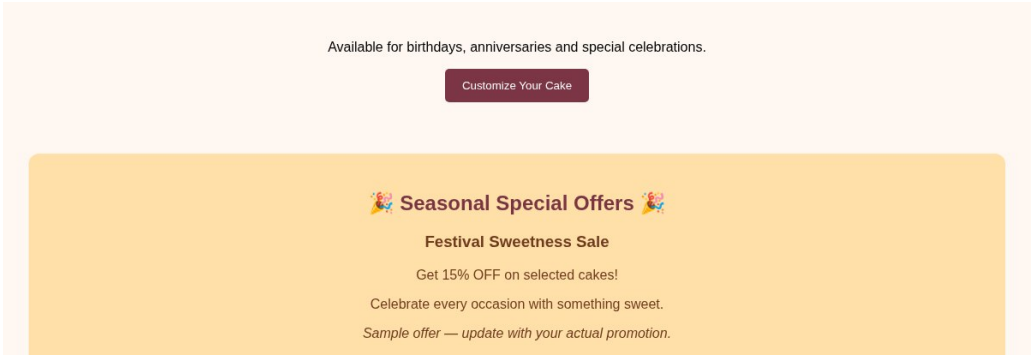

4. Cookies and Biscuits

Shows Chocolate Cookies (■150 per box) and Butter Cookies (■120 per box).

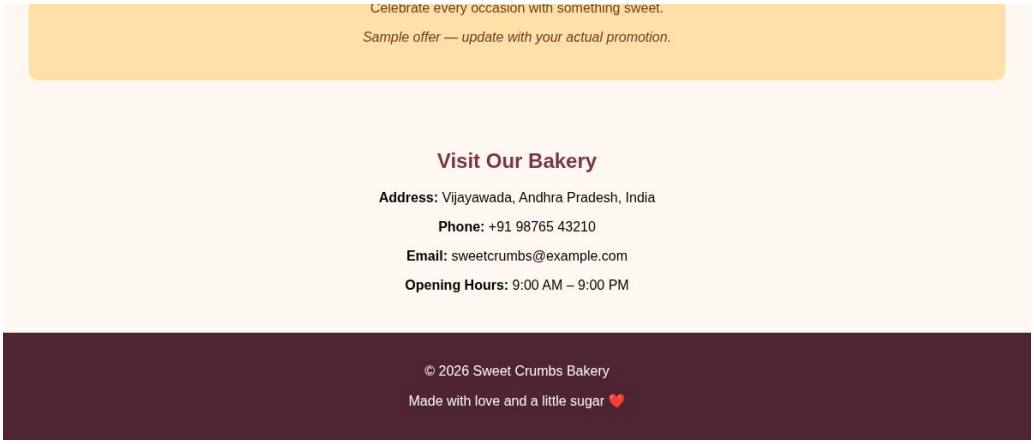

5. Custom Cake Designs

Displays celebration cake designs and a Customize Your Cake button that opens an alert message.

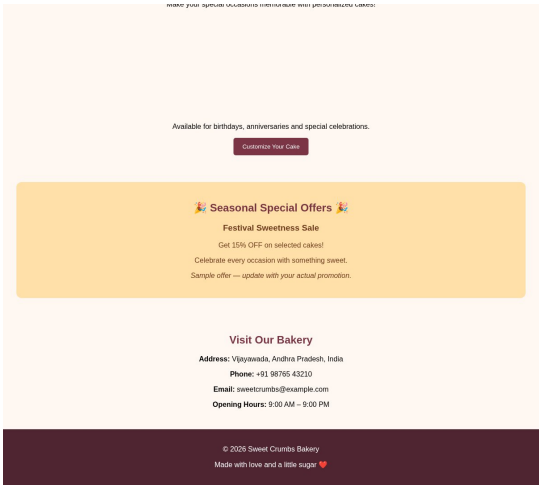

6. Seasonal Special Offers

Highlights a sample Festival Sweetness Sale with 15% off selected cakes.

7. Contact Information

Shows the Vijayawada address, sample phone number, email address and opening hours.

3 Explanation of HTML elements

HTML element	Purpose
<!DOCTYPE html>	Declares an HTML5 document.

HTML element	Purpose
<html>, <head>, <title>	Define document structure and browser title.
<meta name="viewport">	Helps the layout adapt to device width.
<style>	Contains internal CSS styling.
<body>, <header>, <nav>	Contain visible content, website heading and navigation.
<section>,	Group the banner, product cards, offers and contact details.
<h1>, <h2>, <h3>, <p>	Display headings, product descriptions and prices.
<img>	Displays product images with alternative text.
<a href="#...">	Creates links to sections on the same page.
<button>	Displays action buttons.
<i>, <b>	Add italic or bold text.
onclick and alert()	Show a message for custom cake inquiries.

Important attributes: id identifies sections; class connects elements to CSS; src identifies image sources; alt supplies image descriptions; href provides link targets; onclick executes the alert.

4 Explanation of CSS

CSS property	Function
margin, padding	Control external and internal spacing.
font-family, font-size	Set text appearance and size.
background-color, color	Apply the bakery color scheme.
text-align	Align content within elements.
display: flex; flex-wrap: wrap	Arrange product cards in flexible rows.
justify-content, gap	Center and space cards.
width, height, object-fit	Set image and card sizes and crop images.
border-radius, box-shadow	Round card corners and add shadows.
:hover, cursor: pointer	Provide hover effects and pointer feedback.

CSS property	Function
overflow: hidden	Keep content inside rounded card edges.
@media (max-width: 600px)	Adapt the layout for mobile devices.

Responsive design: At screen widths of 600 pixels or less, navigation links can wrap, container padding decreases, product cards use full width, the banner heading becomes smaller and gallery images fit the screen.

5 Development process

Step 1: Plan the website — Identify bakery products, sections, navigation and contact information.

Step 2: Create HTML structure — Add the header, navigation, welcome banner, product cards, gallery, offer, contact section and footer.

Step 3: Apply CSS styling — Set colors, typography, spacing, flexible card layouts and responsive rules.

Step 4: Add bakery information — Include product names, descriptions, images, prices and sample business details.

Step 5: Test the website — Check navigation links, layout, image loading, mobile responsiveness and the custom cake alert.

6 Advantages

The website provides a simple and attractive interface, organized product categories, visible prices, easy section navigation, responsive product cards and a gallery. It is a useful starting point for a complete bakery ordering website.

7 Limitations and future improvements

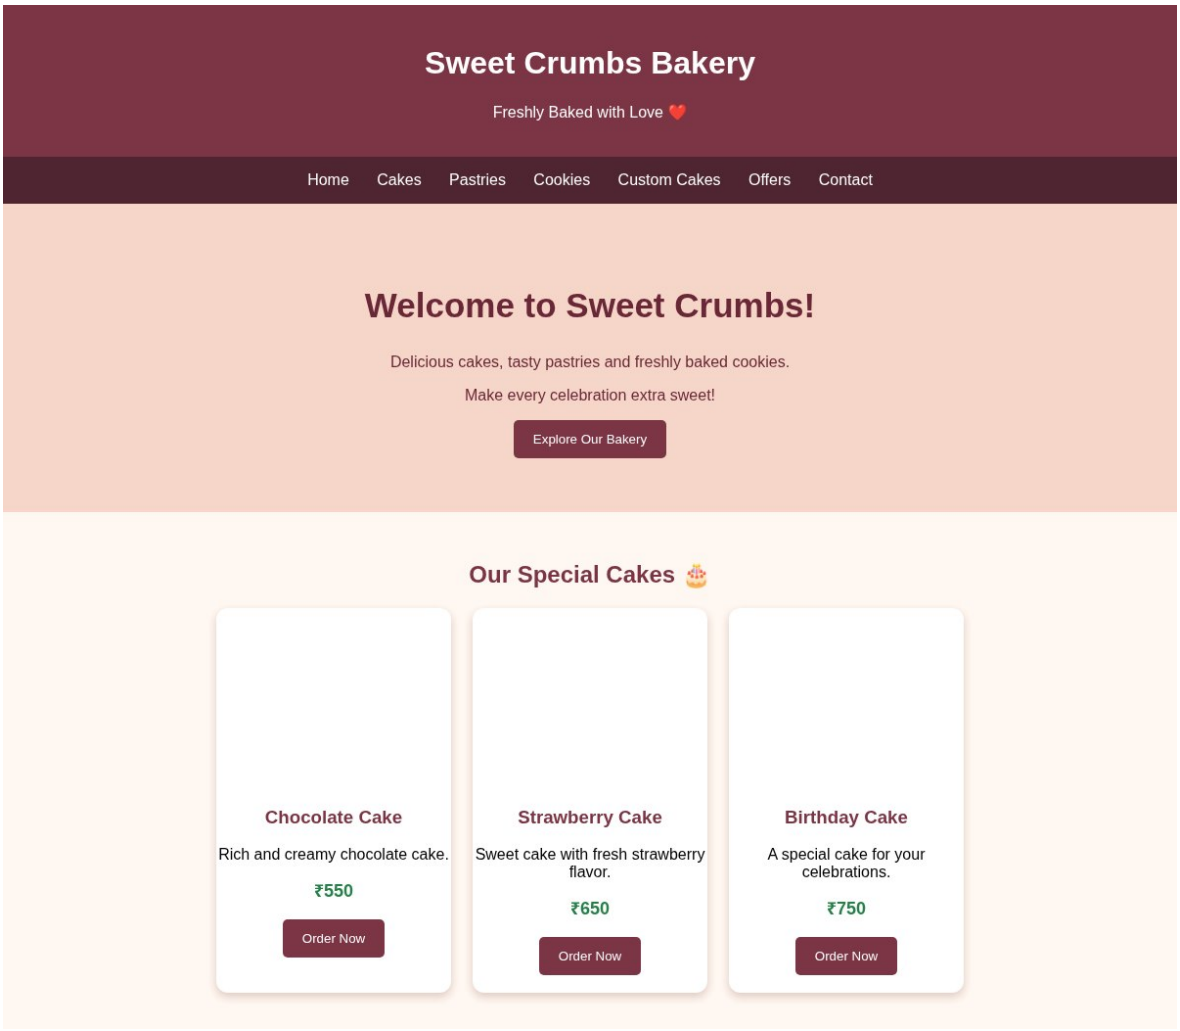

The website is a static front-end demonstration. Order Now buttons do not place orders, and there is no shopping cart, checkout, payment, database or inventory system. The custom cake button only shows an alert. The seasonal promotion and contact information are sample content. Future improvements could add functional orders, a custom cake request form, backend storage, inventory tracking and payment integration.

8 Conclusion

Sweet Crumbs Bakery demonstrates how HTML and CSS can create a structured, attractive and responsive bakery website. It organizes products, shows prices, displays custom designs and supports basic navigation. JavaScript and backend features could extend it into a functional online bakery store.

9 Output

Website output captured from the supplied HTML file. Some externally hosted images may not appear without internet access.

Delicious Pastries 🧁

Cream Pastry

Soft pastry with delicious cream.

₹80

Fresh Bakery Treat

A delightful snack for your day.

₹60

Cookies and Biscuits 🍪

Chocolate Cookies

Crunchy cookies with chocolate chips.

₹150 / box

Butter Cookies

Delicious buttery homemade-style cookies.

₹120 / box

Custom Cake Designs 🎨

Make your special occasions memorable with personalized cakes!

Make your special occasions memorable with personalized cakes!

Available for birthdays, anniversaries and special celebrations.
